ABSTRACT / ZUSAMMENFASSUNG / ABREGE

03017300.9

A projection display device comprises a light source (11), a display section (22,27,35) configured to receive light from the light source (11) and output image light modulated with an image signal, a projection device (37,38) configured to project the image light output from the display section (22,27,35), a duct device having an air duct (50,51,52,54,55) for conducting air from an air intake (41,42) to an air discharge section (43,44,45) and an air chamber (53) which is formed downstream of the air discharge section in the air duct (52) and configured to blow cooling air from the air discharge section toward the display section, and an air blower (48,49) configured to blow cooling air into the air intake.
